

PRODUCT USAGE MANUAL

THE SYSTEM INCLUDES:

Preparation Products

CLEAN START & PREP

A dual-purpose liquid designed to prepare the natural nail plate. Removes natural oils before applying a base coat or any artificial nail product. Also effectively removes the sticky layer after curing.

ULTRABOND

An acid-free primer. Used before any base coat to ensure strong adhesion between the natural nail plate and the base. Creates a sticky intermediate layer.

ULTRABOND TRIPLE STRONG

An acid-free primer enriched with vitamins. Recommended for weak or damaged nails. Provides even stronger adhesion, strengthens the nail plate, helps prevent peeling, and prolongs the durability of the coating.

Base Coats

Hard Base Line

These are firm-structured bases designed to strengthen weaker nail plates. They provide excellent adhesion, maintain flexibility, and self-level easily.

- **Hard Base Clear** – Transparent, strong base ensuring solid adhesion and maintaining nail shape.
- **Hard Base Milky** – Milky-colored base that provides coverage and a natural look.
- **Hard Base Sweet Pink** – Soft pink tone suitable for natural and everyday manicures.
- **Hard Base Fresh Beige** – Sand tone, lightly camouflaging, ideal for fair skin.
- **Hard Base Powder Puff** – Base with fiberglass, extremely strong, intended for very weak nails.
- **Hard Base Rosy Pink** – Gentle pink base with vitamins for strengthening the nail plate.
- **Hard Base Light Peach** – Peach-toned base providing a natural appearance.
- **Hard Base Milky Shimmer** – Milky tone with pearlescent shine for a subtle glow.
- **Hard Base Nude Shimmer** – Nude shade with shimmer, suitable both as a base and for design.
- **Hard Base Light Pink** – Light pink classic base, versatile for various manicures.

Elastic Base Line

Highly elastic bases with medium viscosity. Easy to control, self-leveling, and perfect for shaping the surface. Suitable for shorter natural nails or application on artificial nails.

- **Elastic Base Milky** – Milky tone ideal for creating an aesthetic surface.
 - **Elastic Base Nude** – Nude tone for a clean, natural appearance.
 - **Elastic Base Milky Pink** – Milky pink shade, often chosen for subtle designs and the baby boomer effect.
 - **Pedibase Clear** – Transparent base specially formulated for pedicure use. Strong and elastic texture, adapted to thicker toenails.
 - **Probase First Step** – Used as the first step before applying the base. Improves adhesion and prevents moisture from penetrating between the product and the natural nail plate. Can be used before any gels, bases, poly gels, or acrygels.
-

Top Coats

- **Top Coat Clear** – Transparent, glossy finish that protects color.
 - **Top Coat Milky** – Soft milky tone providing light coverage.
 - **Top Coat Milky Pink** – Pink tone suitable for use over base or color.
 - **Top Coat Sparkle Touch** – Top coat with subtle sparkle.
 - **Top Coat Silver Glaze** – Pearlized silver effect.
 - **Top Coat Rose Pearl** – Soft pink pearl effect.
 - **Top Coat Blue Pearl** – Blue pearl effect, ideal for cool-toned colors.
-

Colored Gels in Bottles (Bottle Gel)

“Bottle Gel” – innovative hard gels in bottles designed for convenient and fast work. This line offers excellent self-leveling properties, strong structure, and a wide range of colors that allow both natural and vivid manicures. Perfect for strengthening or sculpting the nail and highly valued for time-saving – filing is often unnecessary.

Ideal for professional salon work where speed, quality, and aesthetics matter.

- **Bottle Gel Debutante** – Soft, elegant tone for everyday manicures.
- **Bottle Gel Ice Cream** – Pastel light tone reminiscent of gentle summer shades.
- **Bottle Gel Milky Pink** – Classic milky pink, versatile and beloved by clients.
- **Bottle Gel Milkshake Blush** – Pinkish beige tone, subtle and natural.
- **Bottle Gel Peachy Promise** – Warm peach shade for a fresh feeling.
- **Bottle Gel Lavander Dream** – Lavender violet tone for a stylish, unique look.
- **Bottle Gel Milky White** – Bright milky white shade, perfect for clean, minimalist designs.
- **Bottle Gel Rose Latte** – Soft pink with coffee undertones, modern and elegant.

Nail and Cuticle Care

OIL DROPS

A nourishing oil designed to moisturize and strengthen cuticles and the natural nail plate.

Contains 20 natural oils including chamomile, lavender, and bergamot, enriched with vitamin

E. Can be used after manicure, pedicure, or even as a hair oil.

GEL POLISH APPLICATION INSTRUCTIONS

1. Perform manicure (shape the nail, clean the cuticles).
2. Buff the nail plate lightly.
3. Degrease the nail using CLEAN START & PREP.
4. Apply Ultrabond.
5. Apply a full layer of Probase base.
6. Apply the chosen gel product (Elastic Base, Hard Base, or Bottle Gel) depending on the nail condition.
7. Apply two thin layers of gel polish.
8. Finish with a Top Coat layer.
 - All Jelly Gelly gel products cure for 120 seconds in UV lamps or 60 seconds in LED lamps.

GEL POLISH REMOVAL INSTRUCTIONS

1. Gently file off the gel coating using an e-file and carbide bit.
2. You may leave a thin layer of base coat.
3. Smooth the nail surface with a buffer.

Jelly Gelly Elastic Bases

- Highly elastic bases with medium consistency.
- Easy to control and self-leveling – perfect for shaping the surface.
- Used for short natural nails or for applying on artificial nails.
- Suitable for both manicure and pedicure.
- pH between 6–7.
- Curing time: UV lamp – 120 s; LED lamp – 60 s.

**Application:**

- Prepare the nail shape and cuticles.
- Buff the nail surface.
- Degrease the nail.
- For better adhesion, use Jelly Gelly Ultrabond or Ultrabond Triple Strong.
- Apply Probase First Step as a rubbing or first layer, cure for 60 s (curing time depends on lamp power).
- Apply a thin layer of base, cure for 60 s.
- Apply a second, thicker layer to build the structure and cure again for 60 s.
- You may also create the structure in one modeling layer using the self-leveling technique (by turning the finger upside down).

Storage and Safety:

Store in a dry place at room temperature. Protect from sunlight and heat sources. Keep only in the original, sealed packaging. Recommended to use within 12 months after opening. For external use only. Keep out of reach of children. Avoid contact with eyes, do not inhale or ingest. In case of allergic reaction (rash, redness, itching, pain, or swelling), remove the product immediately and seek medical advice. Use only in well-ventilated areas. Use only as directed.

Jelly Gelly Hard Bases

Firm-consistency bases designed to strengthen and sculpt the natural nail. Reinforces the nail structure and helps prevent peeling or breakage. Suitable for both short natural nails and nail extensions. Easy to apply, self-leveling, and ideal for creating a perfect nail architecture. pH between 6–7.

Curing time: UV – 120 s; LED – 60 s.

Application:

Prepare the nail and cuticles.

Buff and degrease the nail plate.

For stronger adhesion, use Jelly Gelly Ultrabond or Ultrabond Triple Strong.

Apply Probase First Step as a rubbing or first layer and cure for 60 s.

Apply a thin layer of base and cure for 60 s.

Apply a thicker layer to build the structure and cure for 60 s.

You may also shape the nail using one modeling layer and the self-leveling technique.

Storage and Safety:

Store in a dry place at room temperature, away from sunlight and heat. Keep in the original packaging. Recommended to use within 12 months after opening. For external use only. Keep

away from children. Avoid eye contact, inhalation, or ingestion. If allergic reactions occur, remove the product and consult a doctor. Use in a well-ventilated area and only as directed.

Probase First Step

Probase First Step is a highly elastic, low-viscosity product used as the first layer before base application. It improves adhesion between the natural nail and the product, protecting against moisture. Especially recommended for clients prone to lifting. Excellent adhesion and protection even for problematic nails.

pH level: 3–4.

Curing time: UV – 120 s, LED – 60 s.

Application:

Prepare the nail and cuticles. Buff and degrease the nail. Optionally use Ultrabond or Ultrabond Triple Strong. Apply a thin rubbing layer of Probase First Step and cure for 60 s. Continue with your chosen base, bottle gel, or acrygel/polygel.

Safety and Storage:

Store dry at room temperature, away from sunlight and heat. Keep sealed in original packaging. Use within 12 months after opening. External use only. Keep away from children. Avoid eyes, inhalation, ingestion. In case of allergy symptoms (rash, redness, itching, pain, swelling), remove product and consult a doctor. Use in a ventilated area, only as directed. FOR PROFESSIONAL USE ONLY.

PediBase

PediBase is a highly elastic, low-viscosity base designed for pedicure use.

pH level: 3–4.

Curing time: UV – 120 s, LED – 60 s.

Application:

Prepare nails and cuticles. Buff and degrease. Optionally use Ultrabond or Ultrabond Triple Strong. Apply a thin layer of PediBase and cure for 60 s. Continue with gel polish application.

Safety and Storage:

Store dry at room temperature, away from sunlight and heat. Keep sealed in original packaging. Use within 12 months after opening. External use only. Keep away from children. Avoid eyes, inhalation, ingestion. In case of allergic reaction, remove product and consult a doctor. Use only as directed. FOR PROFESSIONAL USE ONLY.

Clean Start

Clean Start is a liquid, fast-evaporating prep solution designed to dehydrate and degrease the nail plate before the procedure. Used in the first stage to remove oils, dust, and moisture from the nail surface, ensuring optimal adhesion and long-lasting results. Also suitable for removing the dispersion (sticky) layer after curing. Acid-free, gentle yet effective.

Application: Apply a small amount to a lint-free wipe and clean the nail plate before Ultrabond, Probase, or base application. Can also be used to remove the sticky layer after curing. Let it evaporate or proceed after a few seconds.

Safety: Flammable. Store cool and dry, away from direct sunlight and open flame. For external use only. Keep away from children. Use only in a ventilated space.

Jelly Gelly Ultrabond

Acid-free primer. Used before any base. Creates a sticky layer that works as a double-sided adhesive tape between the natural nail and product.

Application: Remove old product if necessary. Clean and degrease nails. Apply primer carefully avoiding cuticles. Allow to dry for ~30 seconds. Continue with base application.

Storage/Safety: Flammable. Store dry, at room temperature, away from heat and light. Use within 24 months of opening. For external use only. Avoid eyes, inhalation, ingestion. Keep away from children. Do not use if allergic. In case of reaction, remove immediately. FOR PROFESSIONAL USE ONLY.

Jelly Gelly Ultrabond Triple Strong with Vitamins

Acid-free primer used before any base. Acts like a double-sided adhesive tape between the natural nail and the product.

Enriched with vitamins to strengthen the nail plate.

Provides double adhesion strength, extends product wear, and prevents lifting.

Application: Remove old material if necessary. Clean and degrease. Apply a very thin layer avoiding cuticles. Allow to dry for ~60 seconds. Proceed with base, gel polish, poly gel, or acrylic.

Storage/Safety: Same as Ultrabond. Flammable. Store cool, dry, and in original packaging. For professional use only.

Jelly Gelly Bottle Gel

Features:

Hard gel in a bottle with a brush for quick and easy strengthening or nail extension. Medium viscosity. Can be used as a gel polish base. For strengthening natural nails, lightly file the

free edge.

Curing time: LED – 60 s, UV – 120 s.

Application:

After manicure, prepare the natural nail plate.

Clean with dehydrator and degreaser.

Apply a thin layer of Ultrabond.

Rub in a thin layer of Probase and cure (LED – 60 s, UV – 120 s).

Apply Bottle Gel on the natural nail or form and cure (LED – 60 s, UV – 120 s).

Finish with color and Top Coat.

For professional use only.

Top Coat

Jelly Gelly Top Coats are designed to protect color, provide long-lasting shine, or create a desired finish. Durable, easy to use, and offer different effects – from classic gloss to subtle pearlescent glow.

Curing time: LED – 60 s, UV – 120 s.

No sticky layer remains after curing.

Types:

Top Coat Clear – transparent with lasting shine.

Top Coat Milky – soft milky blur effect.

Top Coat Milky Pink – milky pink for delicate manicures.

Top Coat Sparkle Touch – clear with micro glitter.

Top Coat Silver Glaze – pearly silver tone for a cool shine.

Top Coat Rose Pearl – pink pearl tone for a warm, luxurious look.

Top Coat Blue Pearl – cool blue pearl for unique results.

Application:

Apply a thin, even layer over cured color or base. Cure 60 s in LED (120 s in UV). No cleaning needed after curing.

Safety and Storage:

Store in a cool, dry place away from sunlight and heat. For external use only. Avoid eyes and skin. Keep away from children. Use within 24 months of opening.
