

GEL USE INSTRUCTIONS

THE SYSTEM INCLUDES:

Preparation Products

CLEAN START & PREP

A dual-purpose liquid designed to prepare the natural nail plate. Removes natural oils before applying a base or other artificial nail products. Also effectively removes the sticky layer after curing.

ULTRABOND

An acid-free primer used before any base coat. Ensures strong adhesion between the natural nail plate and the base. Creates a sticky intermediate layer.

ULTRABOND TRIPLE STRONG

An acid-free primer enriched with vitamins. Recommended for weak or damaged nails. Provides even stronger adhesion, strengthens the nail plate, helps prevent peeling, and prolongs wear time.

Base Layers

Probase First Step – Used as the first step before the base. Improves adhesion and prevents moisture from penetrating between the product and the natural nail plate. Can be used before all gels, bases, polygels, and acrygels.

Top Coats

Top Coat Clear – Transparent, glossy finish that protects the color.

Top Coat Milky – Soft milky tone providing light coverage.

Top Coat Milky Pink – Pink shade suitable for application over base or color.

Top Coat Sparkle Touch – Top coat with a delicate shimmer.

Top Coat Silver Glaze – Pearly silver effect.

Top Coat Rose Pearl – Soft pink pearl effect.

Top Coat Blue Pearl – Blue pearl effect, ideal for cool tones.

Probase First Step

Probase First Step is a highly elastic, low-viscosity product used as the first layer before the

www.manikiurom.lt

base. It enhances adhesion between the natural nail surface and gel or base, protecting against moisture penetration. Especially recommended for clients prone to lifting. It ensures excellent adhesion and additional protection even for problematic nails.

pH level – between 3–4.

Curing time: UV lamp – 120 seconds, LED lamp – 60 seconds.

Application:

Prepare the nail shape and cuticles.

Buff and degrease the nail surface.

If desired, apply Ultrabond or Ultrabond Triple Strong.

Then apply a thin rubbing layer of Probäse First Step and cure for 60 seconds.

Continue working with the chosen base, bottle gel, or acrygel/polygel.

Storage and Safety Instructions:

Store in a dry place at room temperature. Protect from direct sunlight and heat sources. The product retains its properties only in its original, unopened packaging. Recommended to use within 12 months after opening.

For external use only. Keep out of reach of children. Avoid contact with eyes, do not inhale, and do not swallow.

In case of allergic reactions (rash, redness, itching, pain, or swelling), remove the product immediately and consult a doctor.

Use in a well-ventilated area, only as directed.

FOR PROFESSIONAL USE ONLY.

Clean Start

Clean Start is a liquid, fast-evaporating preparation for degreasing and dehydrating the nail plate before the procedure. Used in the first step to remove oils, dust, and moisture from the nail surface. This step is essential to ensure maximum adhesion with the base or gel and long-lasting results. Also suitable for removing the dispersion (sticky) layer after curing.

The product is suitable for both manicure and pedicure. It is acid-free, gentle, yet effective.

Application:

Apply a small amount of Clean Start onto a lint-free pad or cotton swab and thoroughly wipe the nail plate before using Ultrabond, Probäse, or base.

It can also be used to remove the sticky layer after curing. Let it evaporate naturally or proceed to the next step after a few seconds.

Storage and Safety Instructions:

Store in a cool, dry place away from direct sunlight and open flame.

Flammable. Use only in a well-ventilated area. Avoid contact with eyes.

For external use only. Keep out of reach of children.

Jelly Gelly Ultrabond

Acid-free primer.

Applied before any base.

Has a sticky layer and works like double-sided adhesive tape between the natural nail plate and the product.

Application:

If necessary, remove old material.

Eliminate any lifting or air pockets if present.

Shape the nail and clean the cuticles.

Degrease the nail plate.

Carefully apply the primer avoiding the cuticle area.

Allow the product to dry (about 30 seconds).

Apply the base as usual.

Storage and Safety Instructions:

Store in a dry place at room temperature.

Caution – flammable. Keep away from heat sources and direct sunlight.

The product retains its properties only when properly stored in an unopened original package.

Recommended to use within 24 months after opening.

The product's shelf life and composition are indicated on the packaging/label.

For external use only. Keep out of reach of children.

Do not swallow or inhale. In case of contact with eyes, rinse thoroughly with plenty of water and consult a doctor.

Do not use if allergic to product ingredients.

If any allergic symptoms occur (rash, redness, itching, pain, swelling, etc.), immediately remove the product from the nail and consult a doctor.

Use in a well-ventilated area.

Use only as intended and as instructed.

FOR PROFESSIONAL USE ONLY.

Jelly Gelly Ultrabond Triple Strong with Vitamins

- Acid-free.
- Applied before any base.
- Has a sticky layer and acts like double-sided adhesive tape between the natural nail and the product.
- Suitable for weak and damaged nails.
- Enriched with vitamins that strengthen the nail plate.
- Provides double adhesion strength.

Jelly Gelly Bottle Gel

Features:

Hard gel in a bottle with a brush that allows faster natural nail strengthening or extension.

Medium viscosity.

Can be used as a gel polish base.

When strengthening natural nails, it's recommended to slightly file the free edge.

Curing time – LED: 60 sec., UV: 120 sec.

Application:

Perform manicure and prepare the natural nail plate.

Clean the natural nail using a dehydrator and degreaser.

Apply a thin layer of Ultrabond.

Rub in a thin layer of elastic Probase and cure – LED: 60 sec., UV: 120 sec.

Sculpt the gel on the natural nail or on the extension form and cure – LED: 60 sec., UV: 120 sec.

Apply color and Top Coat.

For professional use only.

Colored Self-Leveling Gels (Fluffy Gel)

Fluffy Gel is a range of self-leveling hard gels designed for comfortable and fast work. The line features a light texture, perfect leveling, and a wide color selection for both natural-looking and vivid manicures. Highly valued for easy application and time-saving – filing is often unnecessary, and the result is always smooth and aesthetic.

Perfect for professional salon work where speed, quality, and flawless appearance are essential.

Shades:

- Nude – classic tone suitable for everyday manicures.
- Cover Nude – richer nude tone providing perfect coverage and elegant look.
- Natural Rose – soft pink for a natural and fresh feel.
- Sweet Pink – brighter pink adding a playful charm.
- Powder Puff – pastel pink tone for subtle, stylish designs.
- Clear – transparent, universal choice for extensions and as a base.

Features:

- Self-leveling hard gel ensuring a smooth surface.
- Medium thickness – comfortable for modeling and strengthening.
- Ideal for natural nail strengthening or extensions.

- Durable – does not peel or crack.
- Can be used as a base for gel polish.

Application:

1. Prepare the nail shape and cuticles.
2. Buff and degrease the surface.
3. Optionally, use Ultrabond or Ultrabond Triple Strong.
4. Apply a thin rubbing layer of Probase First Step and cure for 60 seconds.
5. Apply a thin base layer or a thicker one for architecture shaping.
6. When strengthening natural nails, lightly file the free edge.
7. Curing time: LED – 60 sec., UV – 120 sec.
8. Continue with color or design.

Builder Gels (Gellato Gel)

Gellato Gel are strong, jelly-consistency builder gels designed for professional use. They are firm and non-running, ideal for nail extensions and Dual Form applications. Their texture allows for creating perfect architecture, ensuring durability and maintaining shape throughout wear.

Perfect for professionals seeking reliable gel for complex extensions or long nail forms.

Shades:

- Clear – transparent, universal choice for extensions or as a base.
- Nude – classic tone for everyday manicures.
- Cover Nude – deeper nude with elegant coverage.
- Natural Rose – soft pink giving a fresh, natural look.
- Sweet Pink – brighter pink adding playful charm.
- Powder Puff – pastel pink for subtle and chic designs.

Features:

- Strong, jelly-consistency builder gel.
- Non-running – easy to form architecture.
- Extremely durable – ideal for long nails and complex shapes.
- Suitable for Dual Form work.
- Does not crack or chip.

Application:

1. Prepare the nail and cuticles.
2. Buff and degrease the surface.
3. If desired, use Ultrabond or Ultrabond Triple Strong.
4. Apply a thin rubbing layer of Probase First Step and cure for 60 seconds.

5. Apply Gellato Gel onto the nail or form, creating desired architecture.
6. When using Dual Forms – fill the form with gel, apply on the nail, and cure.
7. Curing time: LED – 60 sec., UV – 120 sec.
8. After curing, remove the sticky layer, file into shape, and continue with color or design.

Design and French Manicure Gels

These gels are designed for precise work where high pigmentation, coverage, and accuracy are essential. Thanks to their thickness and strong pigmentation, they are ideal for fine nail art designs and classic French manicure lines.

Shades:

- White – intense, bright white for perfect French lines or accents.
- Black – deep black ideal for contrast designs, line art, or modern styles.

Features:

- Highly pigmented – vivid color from the first layer.
- Medium-thick consistency – easy for detailed work.
- Non-running – provides precise results.
- Durable – does not chip or fade.
- Suitable for nail art and French manicure.

Application:

1. Prepare the nail following standard technique.
2. Use a fine brush to draw lines or designs.
3. Apply a second layer if needed for stronger color.
4. Curing: LED – 60 sec., UV – 120 sec.
5. Finish with your chosen design or seal with top coat.
